

Macintosh Quadra 605

Features

Power and speed

- 25-MHz 680LC40 microprocessor

Memory

- 4MB of RAM on board, expandable to 36MB

Displays

- Works with all Apple and many third-party displays
- 256 colors, expandable to 32,768

Expansion

- Slot supports most Macintosh LC II, LC III, and LC 520 expansion cards
- Seven built-in ports for peripherals

Features Built Into Every Macintosh

Usability

- Runs thousands of Macintosh applications
- Easy to set up, learn, use, and expand

System software

- System software version 7.1 with multitasking, file sharing, QuickTime, Balloon Help, TrueType, and more

Networking

- Built-in AppleTalk networking
- File sharing without a dedicated server

Compatibility

- Reads Macintosh, MS-DOS, OS/2, and ProDOS floppy disk formats

The Apple Macintosh Quadra 605 personal computer, Apple's most affordable high-performance desktop system, is an ideal multipurpose personal computer for business and professional users. Like all Macintosh Quadra computers, it puts the highest levels of Macintosh performance and flexibility at your fingertips. Yet the Macintosh Quadra 605 brings the cost of high performance down to almost any budget, and its new, slimline design saves desk space.

The Macintosh Quadra 605 uses the powerful 680LC40 processor, so you can scroll, search, and sort through your applications faster than ever before. You'll also appreciate the speed with which the Macintosh Quadra 605 redraws graphics, recalculates spreadsheets, and reformats large documents. It comes with 4 megabytes of RAM on board, expandable to 36, so you can work with multiple applications simultaneously.

Like other Macintosh Quadra computers, the Macintosh Quadra 605 includes many standard features that you pay extra for on other computers—for instance stereo sound and built-in support for all Apple displays (256 colors) and many third-party displays. With additional video RAM, it can display more than 32,000 colors on 14- and 16-inch displays.

The Macintosh Quadra 605 also has built-in networking capability, comes standard with an Apple SuperDrive, and accommodates an 80- or 160-megabyte internal hard disk. Multiple ports provide direct connection to peripherals such as high-capacity CD-ROM drives, scanners, and modems, so you can create the system that fits your needs. As an added advantage, the Macintosh Quadra 605 is one of the most energy-efficient systems Apple has ever built, and is fully compliant with the Energy Star program of the Environmental Protection Agency.
